EDUCATION

California Polytechnic State University

San Luis Obispo, CA

Bachelor of Science in Computer Science — Jun 2026

- **Relevant Coursework:** Data Structures, Algorithms, Systems Programming, Operating Systems, Computer Organization, Database Systems, Networked & Distributed Computing, Web Development, Mobile Development, and Data Science

EXPERIENCE

California Polytechnic State University

Apr 2026 – Jun 2026

Course Grader, EE 428: Computer Vision

San Luis Obispo, CA

- Graded labs and programming assignments for **17 students** in **EE 428: Computer Vision**, reviewing Python and NumPy implementations for image processing and computer vision tasks.
- Evaluated student code on topics including image normalization, filtering, convolution kernels, interpolation, segmentation, stereo vision, and feature extraction.
- Provided detailed, rubric-based feedback by identifying implementation errors, applying consistent deductions, and maintaining timely grading for coursework and laboratory assignments.

PROJECTS

SLO n Study

Jan 2026 – Mar 2026

Android Developer — 2-Person Team — Kotlin, Jetpack Compose, OSMDroid, Overpass API

San Luis Obispo, CA

- Built an Android app that helps students find study spots in San Luis Obispo, including cafes and libraries with study-friendly amenities.
- Integrated **OSMDroid** and the **Overpass API** to display interactive map markers using OpenStreetMap location data.
- Used **Jetpack Compose** state hoisting to support reactive search, filtering, and dynamic updates to displayed locations.

Daily Song Recommendation Platform — Senior Project

Aug 2025 – Jun 2026

Full-Stack Developer — React, Node.js, Express.js, Supabase, Python, Deezer API

San Luis Obispo, CA

- Developed a full-stack music discovery platform that generates a new daily song recommendation while preventing the same genre from being selected on consecutive days.
- Built REST API endpoints and **Supabase** database models for user accounts, listening streaks, daily activity, recommendation history, saved songs, and friend connections.
- Integrated the **Deezer API** for song metadata and previews and automated daily recommendation generation using **Python** and scheduled backend jobs.
- Implemented account recovery, friend requests, notification preferences, and AI-generated song descriptions using a locally hosted language model.

Personal Portfolio Website

Jan 2025 – Present

Frontend Developer — HTML, CSS, GitHub Pages

San Luis Obispo, CA

- Developed a personal portfolio website to showcase projects, technical skills, and coursework in a clean, responsive format.
- Built reusable page sections with semantic **HTML** and **CSS**, emphasizing accessibility, organization, and visual consistency.
- Deployed the site using **GitHub Pages** and iterated on content and design to strengthen presentation of technical work.

SLOutions

Sep 2024 – Jan 2025

Full-Stack Developer — React, Node.js, Express.js, MongoDB

San Luis Obispo, CA

- Developed a full-stack survey platform using **React**, **Node.js**, **Express.js**, and **MongoDB**.
- Designed and implemented database schemas, queries, and backend APIs to support dynamic survey creation, response tracking, and analytics.
- Collaborated in **Agile** sprints to improve UI functionality, test performance, and iterate based on user feedback.

SLOmotion

Apr 2025 – Jun 2025

Backend Developer — FastAPI, PostgreSQL, Docker, Alembic, Render

San Luis Obispo, CA

- Developed and deployed backend features for a movie-tracking analytics dashboard using **FastAPI** and **PostgreSQL**.
- Containerized the application with **Docker** and managed database schema migrations with **Alembic**.
- Deployed backend services on **Render** and documented REST API endpoints with Swagger to support testing and integration.
- Improved database queries and data models to enhance scalability, maintainability, and response time.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, TypeScript, Kotlin, SQL (PostgreSQL), HTML, CSS, RISC-V Assembly

Frameworks & Libraries: React, Node.js, Express.js, FastAPI, Astro, Bootstrap, Lit, Jetpack Compose, OSMDroid

Developer Tools: Git, Docker, VS Code, PyCharm, IntelliJ IDEA, MongoDB, Netlify, GitHub Pages, Render, Alembic

Concepts: REST APIs, Responsive Web Design, Client-Side Rendering, UI/UX Design, Deployment Pipelines
